Re: Maricopa County's Routers; Additional Passwords

Kory,

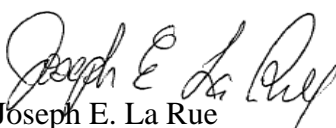

This letter is in response to your email from this morning, in which you informed me of the Senate's desire to obtain additional passwords and the County's routers today. As I previously explained by letter to Ken Bennett, the County is unable to produce these materials for the following reasons.

First, the County has already produced every password and security key for the tabulators that is within the County's possession. It does not have any others.

Second, the County's routers were not used solely for election-related activities. They were used by the entire County. Providing them or their virtual images could jeopardize the security of law enforcement data and programs, as well as Maricopa County citizens' financial, health care, and other private information. We are working with knowledgeable personnel to determine if there is a safe manner to get the Senate the information about the November 3, 2020 election without jeopardizing this other information. We have been unable to do that by close of business today.

Respectfully,

ALLISTER ADEL  
MARICOPA COUNTY ATTORNEY

  
Joseph E. La Rue  
Deputy County Attorney
